Safety Information

- Read these Safety instructions carefully.
- Make sure the voltage of the power source is correct before connecting the equipment to the power outlet.
- Do not expose your Panel PC to rain or moisture, in order to prevent shock and fire hazard.
- Keep PDX2-057T away from humidity.
- Do not open the cabinet to avoid electrical shock. Refer to your nearest dealer for qualified personnel servicing.
- Never touch un-insulated terminals or wire unless your power adaptor is disconnected.
- Locate your Panel PC as close as possible to the socket outline for easy access and to avoid force caused by entangling of your arms with surrounding cables from the Panel PC.
- USB connectors are not supplied with Limited Power Sources.
- If the equipment is not used for a long time, disconnect it from the power source to avoid damage by transient overvoltage.

DO NOT ATTEMPT TO OPEN OR TO DISASSEMBLE THE CHASSIS (ENCASING) OF THIS PRODUCT. PLEASE CONTACT YOUR DEALER FOR SERVICING FROM QUALIFIED TECHNICIAN.

1.General Information

1.1 Product Description

PDX2-057T is an ultra-compact platform for the present demanding embedded and productive applications. It has new Vortex86DX2 SoC CPU which consumes only minimum power requirement when running at 933MHz, and DDR2 memory provides faster data transfer rate. By using 5.7" TFT LCD, PDX2-057T becomes the perfect choice for a limited budget. In additional, the integrated 10/100M Ethernet port supplies the communication capability which makes PDX2-057T can be more widely used when running with Linux, Windows CE, Windows XP, Windows 7, Windows Embedded environments to become the perfect solution for system integration.

2.7 Watchdog Timer

There are two watchdog timers in PDX2-057T, we also provide DOS, Linux and WinCE example for your reference. For more technical support, please visit: http://tech.icop.com.tw or download the PDF file: dmp.com.tw/tech

3.Driver Installation

VGA

The Vortex86DX2 processor is integrated RDC Display chip which is an ultra low powered graphics chipset with total power consumption at around 1-1.5 W.

LAN

The Vortex86DX2 processor is integrated 10/100Mbps Ethernet controller that supports both 10/100BASE-T and allows direct connection to your 10/100Mbps Ethernet based Local Area Network for full interaction with local servers, wide area networks such as the Internet.

I/O and IRQ settings can be done by software with the supplied utility software, or it can be set for Plug and Play compatibility. The controller supports: Half / Full-Duplex Ethernet function to double channel bandwidth, auto media detection.

AUDIO

The ALC262 series are 4-Channel High Definition Audio Codecs with UAA (Universal Audio Architecture) featuring two 24-bit stereo DACs and three 20-bit stereo ADCs, they are designed for high performance multimedia desktop and laptop systems. The ALC262 series incorporates proprietary converter technology to achieve over 100dB Signal-to-Noise ratio playback quality; easily meeting PC2001 requirements and also bringing PC sound quality closer to consumer electronic devices.

Operating system support

The PDX2-057T provides the VGA and LAN drivers for Linux, Windows CE, Windows XP Professional, Windows 7, and Windows Embedded standard (WES2009 / WES7).

Please get the drivers from ICOP official website: *tech.icop.com.tw*

PDX2-057T also supports most of the popular Linux distributions, for more detail information, please visit DMP official website:dmp.com.tw/tech/

3.1 PDX2-057T Development Note

<Primary IDE: Master or Slave>

1. Primary IDE Device can be either one of CF or Micro SD and the standard version is for CF slot only.

2. CF Slot: Primary IDE: Master or Slave (User can use slide switch (in side of CF slot) to adjust Master or Slave

3. Micro SD (Optional): Primary Master only

<Window CE6.0 and Compact 7 development guide>

Windows Embedded CE 6.0 and Compact 7 BSPs, trial CE image and development notes, please visit technical website to get more information: tech.icop.com.tw

‹Linux installation note›

Please forced the IDE setting in BIOS to PIO mode before install Linux on PDX2-057T as follows:

Go to the advanced BIOS setting and make the "Onboard IDE Operate Mode" is "Legacy Mode"

‹ Windows XP and Windows 7 installation note ›

Please visit technical website to get more information: tech.icop.com.tw

3.2 BIOS Default setting

If the system cannot be booted after BIOS changes are made, Please follow below procedures in order to restore the CMOS as default setting.

End	Press < **End** > Key, when the power on
. **Del**	Press < **Del** > to enter the AMI BIOS setup
F9	Press < **F9** > to Load Optimized defaults
F10	Press < **F10** > to Save configuration changes and exit setup

Warranty

This product is warranted to be in good working order for a period of one year from the date of purchase. Should this product fail to be in good working order at any time during this period, we will, at our option, replace or repair it at no additional charge except as set forth in the following terms. This warranty does not apply to products damaged by misuse, modifications, accident or disaster. Vendor assumes no liability for any damages, lost profits, lost savings or any other incidental or consequential damage resulting from the use, misuse of, originality to use this product. Vendor will not be liable for any claim made by any other related party. Return authorization must be obtained from the vendor before returned merchandise will be accepted. Authorization can be obtained by calling or faxing the vendor and requesting a Return Merchandise Authorization (RMA) number. Returned goods should always be accompanied by a clear problem description.
